Portfolio: www.CustomDigitalAudio.com

Education: B.A. in Music, Humboldt State University, California.

Senior Web Developer at Symantec

August 2015 - Present

Design and build landing pages and banner ads for Norton products.

Senior Web Developer at Ellie Mae

August 2013 - April 2015

Built, updated, and maintained web properties including Ellie Mae's primary web presence and related micro sites. Identified, tested, and evaluated relevant web platforms and technologies.

Contract Web Developer at Nest Labs

November 2011 – February 2013

Ported the original Nest marketing web site (www.nest.com) to WordPress, and was solely responsible for all updates and changes for almost a year, until we replaced the WordPress version with a custom in-house solution. Worked with the Nest engineering team to build the updated version.

Flash Developer/Programmer and New Media Producer at Creative Search Media

October 2008 to March 2009

Wrote, directed, recorded sound for, narrated, and edited short online videos and animations. Wrote and edited marketing copy for web pages, and informative text for online applications. Conceived and created prototype touch screen applications. Built web sites and implemented animation and interactivity.

Web/New Media Producer at Lyris, Inc (formerly ClickTracks)

June 2003 to January 2008

Wrote, narrated, and animated demos and tutorials that demonstrated and explained features of the ClickTracks application. Created online videos: shot, recorded location audio, processed and edited, and created relevant animations. Provided feedback and ideas for the company web site and software products. Created and updated sections of the web site as necessary, including planning, design, coding, and implementation. Created and published a monthly email newsletter (The InsideTrack) with an associated micro site. Planned, wrote, edited, and implemented the mass emailing, which had about 40,000 subscribers. Wrote and edited newsletter articles and web site copy.

Flash Developer/Programmer at Tatu Digital Design

May 2004 to October 2005

Implemented the Flash front-end for an XML-based online e-learning solution, working directly with the back end programmer and graphic designer. Wrote, implemented, and narrated online Flash tutorials. Performed other ActionScript and PHP programming as necessary.

Flash/ActionScript Programmer at BoldFocus (3W Concepts)

January 1999 to September 2008

Composed and recorded synchronized musical soundtracks and voice-overs for online multimedia. Maintained and developed a Flash-based, database-driven web site, working with back-end programmers. Optimized bandwidth of, and added interactivity to, Flash elements. Reviewed design concepts and made suggestions regarding implementation and usability.
